

**The  
Philodromidae  
spiders  
(Arachnida,  
Aranei) from  
the Crimea**

Today, **49,154** species of spiders in **128** families are known in the world.

Philodromidae Thorell, 1870 – **19<sup>th</sup>** family of the spiders – **31** genera and **536** species.

Decorative white lines consisting of several parallel diagonal strokes in the bottom right corner of the slide.

The first Philodromidae species from Crimea – *Philodromus aureolus* (Clerck, 1758) and *Philodromimus dispar* (Walckenaer, 1826) – was reported by **T. Thorell, 1875**.

*Philodromus* consists of a large number of unrelated species and indeed is a polyphyletic assemblage of the spiders characterized by similar general appearance only. Recently *Philodromus* was subdivided by Wunderlich, 2012 in several distinct genera

**Gen. *Artanes* Thorell, 1870**

**Gen. *Emargidromus* Wunderlich, 2012**
